International application No.	International filing date
PCT/EP2005/003062	(day/month/year) 22/03/2005

Applicant

NOVARTIS AG

1. x The applicant is hereby notified that the international search report and the written opinion of the International Searching Authority have been established and are transmitted herewith.

Filing of amendments and statement under Article 19:

The applicant is entitled, if he so wishes, to amend the claims of the International Application (see Rule 46):

The time limit for filing such amendments is normally two months from the date of transmittal of the International Search Report.

International Bureau of WIPO, 34 chemin des Colombettes Where? Directly to the 1211 Geneva 20, Switzerland, Fascimile No.: (41-22) 338.82.70

For more detailed instructions, see the notes on the accompanying sheet.

The applicant is hereby notified that no international search report will be established and that the declaration under Article 17(2)(a) to that effect and the written opinion of the international Searching Authority are transmitted herewith.

With regard to the protest against payment of (an) additional fee(s) under Rule 40.2, the applicant is notified that:

the protest together with the decision thereon has been transmitted to the International Bureau together with the applicant's request to forward the texts of both the protest and the decision thereon to the designated Offices. no decision has been made yet on the protest; the applicant will be notified as soon as a decision is made.

4. Reminders

Shortly after the expiration of 18 months from the priority date, the international application will be published by the International Bureau. If the applicant wishes to avoid or postpone publication, a notice of withdrawal of the international application, or of the priority claim, must reach the International Bureau as provided in Rules 90bis.1 and 90bis.3, respectively, before the completion of the technical preparations for international publication.

The applicant may submit comments on an informal basis on the written opinion of the International Searching Authority to the International Bureau. The International Bureau will send a copy of such comments to all designated Offices unless an international preliminary examination report has been or is to be established. These comments would also be made available to the public but not before the expiration of 30 months from the priority date.

Within 19 months from the priority date, but only in respect of some designated Offices, a demand for international preliminary examination must be filed if the applicant wishes to postpone the entry into the national phase until 30 months from the priority date (in some Offices even later); otherwise, the applicant must, within 20 months from the priority date, perform the prescribed acts for entry into the national phase before those designated Offices.

In respect of other designated Offices, the time limit of 30 months (or later) will apply even if no demand is filed within 19 months.

See the Annex to Form PCT/IB/301 and, for details about the applicable time limits, Office by Office, see the PCT Applicant's Guide, Volume II, National Chapters and the WIPO Internet site.

NOTES TO FORM PCT/ISA/220

These Notes are intended to give the basic instructions concerning the filing of amendments under article 19. The Notes are based on the requirements of the Patent Cooperation Treaty, the Regulations and the Administrative Instructions under that Treaty. In case of discrepancy between these Notes and those requirements, the latter are applicable. For more detailed information, see also the *PCT Applicant's Guide*, a publication of WIPO.

In these Notes, "Article", "Rule", and "Section" refer to the provisions of the PCT, the PCT Regulations and the PCT Administrative instructions, respectively.

INSTRUCTIONS CONCERNING AMENDMENTS UNDER ARTICLE 19

The applicant has, after having received the international search report and the written opinion of the International Searching Authority, one opportunity to amend the claims of the international application. It should however be emphasized that, since all parts of the international application (claims,description and drawings) may be amended during the international preliminary examination procedure, there is usually no need to file amendments of the claims under Article 19 except where, e.g. the applicant wants the latter to be published for the purposes of provisional protection or has another reason for amending the claims before international publication. Furthermore, it should be emphasized that provisional protection is available in some States only (see *PCT Applicant's Guide*, Annexes B1 and B2).

The attention of the applicant is drawn to the fact that amendments to the claims under Article 19 are not allowed where the International Searching Authority has declared, under Article 17(2), that no international search report would be established (see *PCT Applicant's Guide*, Volume I/A, paragraph 296).

What parts of the international application may be amended?

Under Article 19, only the claims may be amended.

During the international phase, the claims may also be amended (or further amended) under Article 34 before the International Preliminary Examining Authority. The description and drawings may only be amended under Article 34 before the International Examining Authority.

Upon entry into the national phase, all parts of the international application may be amended under Article 28 or, where applicable, Article 41.

When?

Within 2 months from the date of transmittal of the international search report or 16 months from the priority date, whichever time limit expires later. It should be noted, however, that the amendments will be considered as having been received on time if they are received by the International Bureau after the expiration of the applicable time limit but before the completion of the technical preparations for international publication (Rule 46.1).

Where not to file the amendments?

The amendments may only be filed with the International Bureau and not with the receiving Office or the International Searching Authority (Rule 46.2).

Where a demand for international preliminary examination has been/is filed, see below.

How?

Either by cancelling one or more entire claims, by adding one or more new claims or by amending the text of one or more of the claims as filed.

A replacement sheet must be submitted for each sheet of the claims which, on account of an amendment or amendments, differs from the sheet originally filed.

All the claims appearing on a replacement sheet must be numbered in Arabic numerals. Where a claim is cancelled, no renumbering of the other claims is required. In all cases where claims are renumbered, they must be renumbered consecutively (Administrative Instructions, Section 205(b)).

The amendments must be made in the language in which the international application is to be published.

What documents must/may accompany the amendments?

Letter (Section 205(b)):

The amendments must be submitted with a letter.

The letter will not be published with the international application and the amended claims. It should not be confused with the "Statement under Article 19(1)" (see below, under "Statement under Article 19(1)").

The letter must be in English or French, at the choice of the applicant. However, if the language of the international application is English, the letter must be in English; if the language of the international application is French, the letter must be in French.

WRITTEN OPINION OF THE INTERNATIONAL SEARCHING AUTHORITY

International application No. PCT/EP2005/003062

							
	Box	No. I Basis of the opinion					
1.	. With regard to the language, this opinion has been established on the basis of:						
	⊠ t	he international application in the language in which it was filed					
		a translation of the international application into , which is the language of a translation furnished for the ourposes of international search (Rules 12.3(a) and 23.1 (b)).					
2.	With regard to any nucleotide and/or amino acid sequence disclosed in the international application and necessary to the claimed invention, this opinion has been established on the basis of:						
	a. typ	pe of material:					
		a sequence listing					
		table(s) related to the sequence listing					
	b. for	mat of material:					
		on paper					
		in electronic form					
	c. tim	e of filing/furnishing:					
		contained in the international application as filed.					
		filed together with the international application in electronic form.					
		furnished subsequently to this Authority for the purposes of search.					
3.	1	n addition, in the case that more than one version or copy of a sequence listing and/or table relating thereto has been filed or furnished, the required statements that the information in the subsequent or additional copies is identical to that in the application as filed or does not go beyond the application as filed, as appropriate, were furnished.					
4.	Addit	ional comments:

Re Item V

Reasoned statement with regard to novelty, inventive step and industrial applicability; citations and explanations supporting such statement

1. Cited Documents

The following documents are referred to in this communication:

- D1: EP-A-0 768 114 (BOEHRINGER INGELHEIM PHARMACEUTICALS INC) 16 April 1997 (1997-04-16)
- D2: US-B1-6 228 346 (ZHANG ZHENGFENG ET AL) 8 May 2001 (2001-05-08)
- D3: WO 99/65469 A (RTP PHARMA INC) 23 December 1999 (1999-12-23)
- D4: EP-A-0 726 088 (GRÜNENTHAL GMBH) 14 August 1996 (1996-08-14)

2. Novelty

D1 discloses (see page 4, line 35 - page 5, line 22 and examples 5-8 on pages 9,10) a method for homogenization and micronization of a pharmaceutically active ingredient such as ipratropium bromide and albuterol sulfate comprising subjecting a suspension of the active ingredient in a propellant by high pressure homogenization. The subject-matter of claims 1,2,5,6,9-14,16-18,20 is therefore not new (Article 33(2) PCT)

D2 discloses (see examples 1 and 2 on columns 8 and 9) pharmaceutical aerosols for micronizing pharmaceuticals for pulmonary application, which contains a propellant mixture existing in a subcritical state and including two classes of propellant gasses, wherein at least 80% w/w of the micronized pharmaceuticals have a diameter of less than 8 microns. The operating pressure of the composition is preferably for 5 to 20 bar. The subject-matter of claims 1-6,8,11-14,16-20 is therefore not new (Article 33(2) PCT).

D3 discloses (see example 4 on pages 12, 13 and the claims) a process for preparing sub-micron particles of an active compound of up to 2 microns in size comprising: a) dissolving the active compound in a liquefied compressed gas solvent therefor, b) expanding the compressed fluid solution, c) high pressure homogenizing the suspension

from step b), d) recovering the microparticles so produced. The subject-matter of claims 1-6,8,11,12,16-18,21 is therefore not new (Article 33(2) PCT).

3. Inventive Step

Claims 1-6,8-14,16-20 not being new are also not inventive.

Dependent claims 7,15 and 21 are not considered to be inventive since their subjectmatter concerns mere process optimisations that the expert in the field would undertake without the involvment of inventive skills (Article 33(3) PCT).

Regarding independent claim 22

D1 is considered as being the closest prior art. It discloses (see claim 25) a apparatus for homogenizing and micronizing (see page 5, lines 6,7) an aerosol formulation in a closed continuous -loop apparatus under elevated pressure, the apparatus comprising:

- a mixing vessel
- means for performing high pressure homogenization and
- means for connecting said reaction vessel and said means for performing high pressure homogenization in a closed continuous-loop apparatus.

Independent claim 22 differs from D1 in that it discloses two stirred pressure vessels instead of one which is used in a closed continuous-loop.

In the present application, the suspension is formed in a first stirred vessel and stored in a second vessel after the micronization process, whereas in D1 the same stirred vessel is used before and after the micronization process.

Using a second stirred vessel for storing the suspension instead of using the same vessel a second time is considered to be an obvious alternative to the skilled person who seeks to micronize an active agent by high pressure homogenization.

Present claim 22 therefore appears not to be inventive over the prior art (Article 33(3) PCT).

4. Industrial applicability

Claims 1-22 satisfy the criterion of industrial applicability set forth in Article 33(4) PCT.
